Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Batty (U. S. Patent 5,438,160).
2. Regarding claims 1, 6-8 and 12, Batty, see figures 1-2, discloses a connector coupled to provide at least one signal to a board module comprising: a connector lead surface (see rear wall of housing 30 is a lead surface) substantially perpendicular to a board module surface; a first row leads 25 substantially parallel to and a first distance from the board module surface extending substantially perpendicular from the connector lead surface and shape to connect substantially perpendicular to the board module surface at a second distance from the connector lead surface (see rear wall of housing 30 is a lead surface), and a second row of leads 25 substantially parallel to a third distance from the board module surface extending substantially perpendicular from the connector lead surface and shaped to connect substantially perpendicular to the board module surface at a fourth distance from the connector lead surface, wherein the first distance is greater than the third distance wherein the second distance is less than the

fourth distance, and wherein each of the second row of leads 25 are offset from each of the first row of leads 25.

3. Regarding claim 2, Batty discloses the connector is coupled to communicatively couple the board module a backplane 10.

Regarding claims 3-5, 9-11, 13-20, the recitations relating to backplane, payload module etc, rather than structural details relate to use of the product and cannot be relied upon to overcome the reference.

Note that invention as discussed above in specification relates to connector and arrangement of leads and not to specific modules.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phuong KT Dinh whose telephone number is 571-272-2090. The examiner can normally be reached on 8 -5, 5 days a week.
